Dr. Faisal Awartani is the founder and CEO of Insights for Research For Polling and Training (www.insights.ps). Dr. Awartani is a seasoned expert in the field of research, with a wealth of experience in crafting and executing comprehensive quantitative and qualitative research initiatives. Over the course of his career, Dr. Awartani has overseen the successful completion of more than 400 diverse projects in relation to data science, survey research and monitoring and evaluation, encompassing a wide range of sectors including education, health, environment, social and political systems, local governance, performance assessment, customer satisfaction, customer loyalty, and policy analysis. His expertise extends to both public, private sector and international development organizations.

With a geographic scope that spans Palestine, Jordan, and Lebanon, Dr. Awartani has made important contributions to the field of monitoring and evaluation in Palestine and the Arab region. Where he was responsible for the design and implementation of monitoring and evaluation projects of various interventions by international development organizations such as the World Bank, USAID, DFID, UN, etc.. Dr. Awartani conducted many trainings on monitoring and evaluation using quantitative methods. Dr. Awartani is skillful in in translating the objectives of development projects into measurable indicators, facilitating effective monitoring and evaluation processes.

Utilizing a dynamic blend of primary and secondary data sources, Dr. Awartani has provided data support for numerous developmental projects. Furthermore, his proficiency extends to the development and deployment of predictive analytics models, aiding organizations in forecasting and strategic decision-making.

At the academic level, Dr. Awartani holds a master's degree in computer science and earned his Ph.D. in statistics from the American University in Washington DC, USA. His contributions to the field are underscored by a robust portfolio of publications in internationally recognized peer-reviewed journals. Dr. Awartani served as an assistant professor of statistics at both Birzeit university and Arab American university. Where he taught several statistics and research methods courses for both graduate and undergraduate student in statistics, business and economics, data science. He also taught advanced statistics courses for master's and Ph.D. students in the health sciences.

Dr. Awartani's commitment to research excellence and his ability to bridge the gap between data and actionable insights make him an invaluable asset to any project or organization seeking data-driven solutions and rigorous research expertise.
