

Project Name	Career-Oriented Curricula Development for Road Vehicle Maintenance
Project Summary	<p>CODE aims at creating a sustainable model for an academic-official-professional partnership that can deliver concrete results in terms of targeted higher education reform and employability.</p> <p>To serve this purpose, CODE is designed to develop specific competencies and know-how through joint implementation of well-structured activities and cross-cutting initiatives to develop career-oriented curricula for road vehicle maintenance.</p> <p>CODE aims to develop a model for career-oriented curricula and to lay the bases for establishing a relevant Centre of Competence for road vehicles specialization. Its specific objective is to develop curricula that cover engineering, technical, and vocational training, and to create an academic-official-professional partnership for vehicle maintenance profession.</p> <p>Ministries of Higher Education (MOHE) and of Labor (MOL) in Palestine have planned to establish Competence Centre in vehicle maintenance. It requires building competencies and establishing partnerships with the relevant business sector, which are the outputs of this project. Thus, technical education department in the ministry have decided to combine its efforts to the project consortium efforts in order to lay the bases for its establishment.</p>
